

78% of substance abusers are working.

How many are working for you?

As construction companies have implemented Drug-Free Workplace Programs (DFWP), the rate of alcohol and drug abuse has decreased. This is good news for the industry, but bad news if your company is operating without a DFWP.

There are many reasons to become a Drug-Free Workplace—

- Proven reduction in accidents
- Positive public image
- Workers' compensation and other savings
- Contract compliance
- Qualifying for bids

But the most important reason is investing in the safety of your employees.
